## DETAILED ACTION

This is in response to a letter for patent filed on February 13<sup>th</sup>, 2003 in which claims 1-30 are presented for examination. Claims 1-30 are pending in the letter.

### *Claim Rejections - 35 USC § 101*

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-8 and 19-25 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete and tangible result.

For a claimed to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the “progress of science and the useful arts” and therefore are found to be non-statutory subject matter. For a method claim to pass the muster, the recited method must somehow apply, involve, use, or advance the technological arts.

In the present case the inventive concept in claim 1-8, 19-25 only recite an abstract idea. The recited steps merely involve use or advance the technological arts since all the steps can be

Art Unit: 3621

performed in the mind of the user or by use of pencil and paper and no specific technology (e.g. computer, processor) is expressly recited in the body of the claims. *In re Toma (CCPA 197 USPQ 852 (1978))*.

Although the recited method produces a useful, concrete and tangible result, since the claimed invention, as a whole, is not within the technological arts as explained above, claim 1-8 and 19-25 deemed to be directed to non-statutory subject matter.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Griggs (U.S. PG Pub No. 2002/0029384).

5. As per claims 1, 9, 10, 19, Griggs teaches a method of distributing a document of a user comprising registering document distribution request service of a plurality of document distribution providers, receiving a distribution request of the document for the user, compiling a list of distribution options for the document based on the document distribution service of the

Art Unit: 3621

document providers and presenting the list of the distribution options for the document to the user (*see abstract, fig 1A-9, column 0037, 0040, 0043, 0048, 0049*).

6. As per claims 2-8, 11-18 and 20-30, they disclose the same inventive concept as claims 1. Therefore, they are rejected under the same rationale.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. (*see for 892*).
